

SURVEY REPORT ON EMERGING TRENDS IN

Low-Code Application Development

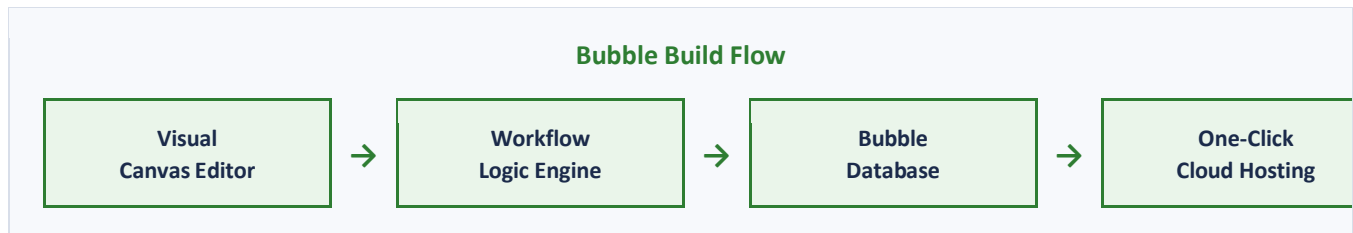

Name : Raghavi S

Roll.No : 241401074

Dept : B.Tech CSBS

1. Bubble

Visual Full-Stack Web Application Builder

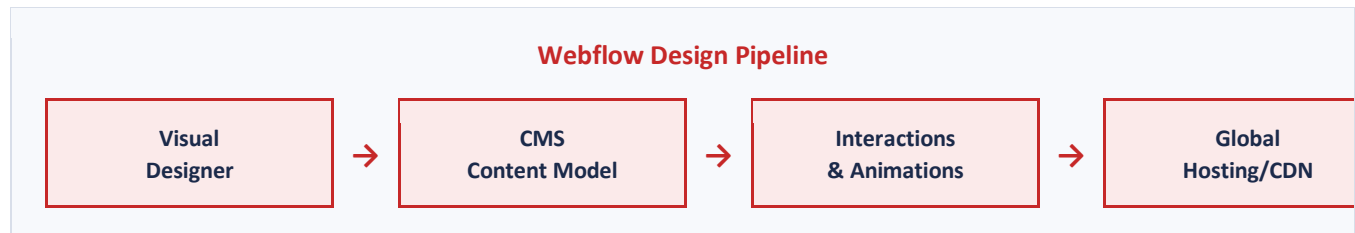

Core Focus: A true no-code platform for building fully custom, database-backed web applications — from MVPs to production SaaS products — without writing traditional code.

Key Features & Capabilities

- **Visual Canvas Editor:** Pixel-level drag-and-drop design of responsive pages, reusable elements, and custom styles.
- **Native Workflow Logic:** Event-driven workflows let builders define conditional logic, API calls, and multi-step actions visually.
- **Built-in Database:** An integrated relational data structure removes the need for a separate backend service for most apps.
- **Plugin & API Ecosystem:** Thousands of community plugins plus native API connectors extend functionality without custom code.

2. Webflow

Visual Web Design & CMS Platform

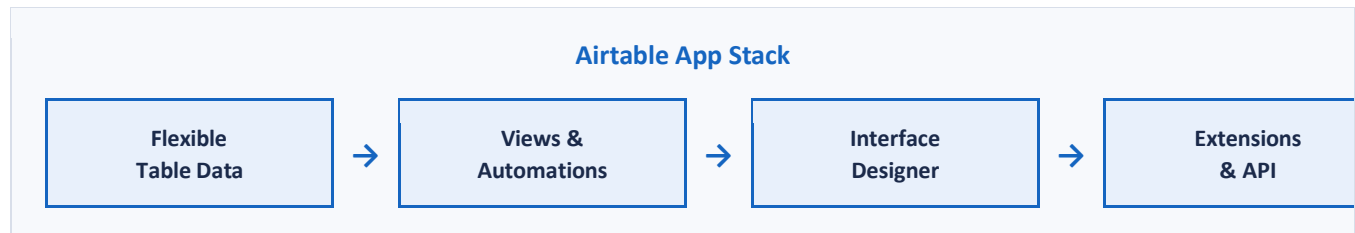

Core Focus: A design-first low-code platform that generates clean, production-ready HTML/CSS/JS, aimed at marketing sites, content-driven sites, and e-commerce storefronts.

Key Features & Capabilities

- **Designer Canvas:** A visual box-model editor that maps directly to real CSS, giving designers full styling control.
- **Webflow CMS:** A flexible content model for blogs, directories, and dynamic collections editable by non-technical teams.
- **Interactions Engine:** Timeline-based animations and scroll-triggered effects built without JavaScript.
- **Integrated Hosting:** Fast, globally distributed hosting with built-in SSL, forms, and basic e-commerce checkout.

3. Airtable

Spreadsheet-Database Hybrid App Platform

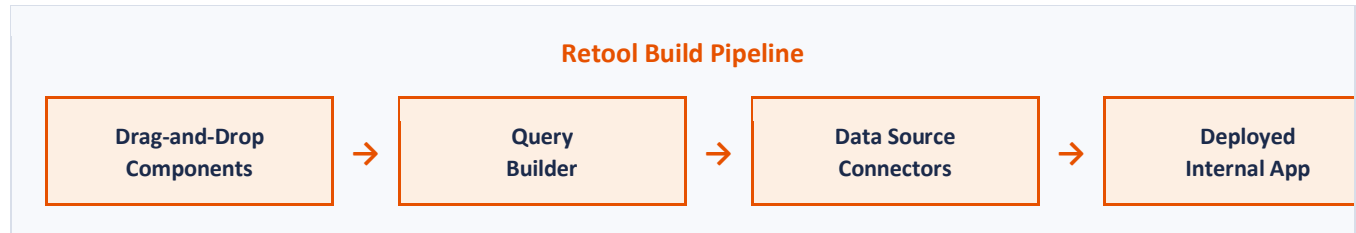

Core Focus: A spreadsheet-simple, database-powerful platform that lets teams model data, automate processes, and build lightweight internal apps on top of shared records.

Key Features & Capabilities

- **Flexible Data Model:** Linked tables, multiple field types, and custom views make relational data approachable for non-engineers.
- **Built-in Automations:** Trigger-based automations handle notifications, record updates, and cross-table workflows.
- **Interface Designer:** A no-code layer for building dashboards, forms, and record-detail apps on top of base data.
- **Extensions & API Access:** A scripting extension and REST API allow deeper customization for technical users.

4. Retool

Internal Tools & Admin Panel Builder

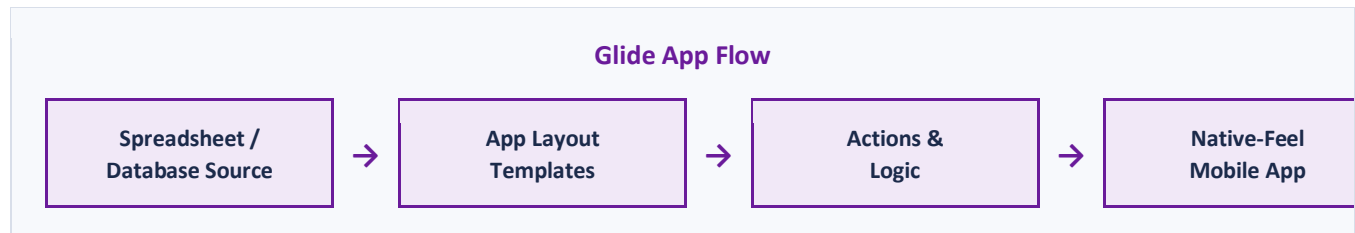

Core Focus: A developer-centric low-code platform purpose-built for assembling internal tools, admin panels, and dashboards on top of existing databases and APIs.

Key Features & Capabilities

- **Pre-Built Components:** A large library of tables, forms, charts, and buttons that snap directly onto data sources.
- **Universal Query Builder:** Write SQL, REST, or GraphQL queries directly, or use visual query steps for common actions.
- **Broad Data Connectivity:** Native connectors for most popular databases, cloud services, and internal APIs.
- **JavaScript Escape Hatches:** Every component exposes scriptable logic, letting pro-code teams customize behavior precisely.

5. Glide

No-Code Mobile App Builder from Data

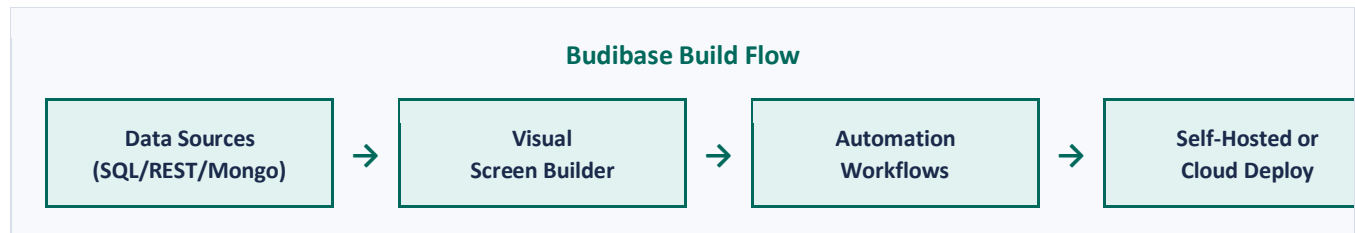

Core Focus: A no-code platform focused on turning existing spreadsheets or databases into polished, native-feeling mobile and tablet apps in a fraction of traditional dev time.

Key Features & Capabilities

- **Data-to-App Conversion:** Apps are generated directly from Google Sheets, Airtable, or Glide Tables with automatic syncing.
- **Mobile-First Templates:** Pre-built layouts for lists, profiles, and forms designed specifically for phone and tablet screens.
- **Visual Actions Builder:** Conditional logic, computed columns, and user actions configured without writing code.
- **Instant Publishing:** Apps can be shared as installable web apps or published to app stores with minimal setup.

6. Budibase

Open-Source Low-Code Platform for Internal Tools

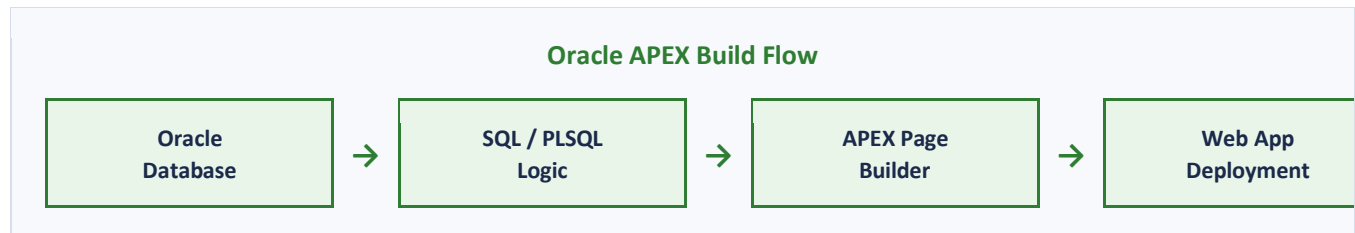

Core Focus: An open-source low-code platform for building internal tools, admin panels, and workflow apps, with the flexibility to self-host for full data control.

Key Features & Capabilities

- **Open-Source Core:** A freely licensed, extensible codebase that developers can inspect, self-host, and customize.
- **Broad Data Connectivity:** Native connectors for SQL databases, REST APIs, MongoDB, Google Sheets, and more.
- **Visual App Builder:** Drag-and-drop screen design paired with a built-in component library for rapid UI assembly.
- **Workflow Automations:** Event-driven automations handle approvals, notifications, and scheduled data tasks.

7. Oracle APEX

Database-Driven Application Development on Oracle

Core Focus: A free, database-native low-code platform for building scalable, secure applications directly on top of the Oracle Database, from simple tools to mission-critical systems.

Key Features & Capabilities

- **Database-First Architecture:** Applications are built directly against the Oracle Database, so data logic and application logic stay close together.
- **SQL & PL/SQL Foundation:** Developers comfortable with SQL and PL/SQL can build sophisticated logic without a separate application server.
- **Included with Oracle Database:** No separate licensing cost for the platform itself when an organization already runs Oracle Database.
- **Enterprise-Grade Scalability:** Used for everything from spreadsheet replacements to large, mission-critical systems serving thousands of users.

8. Zoho Creator

Affordable All-in-One Platform for SMB and Agile Teams

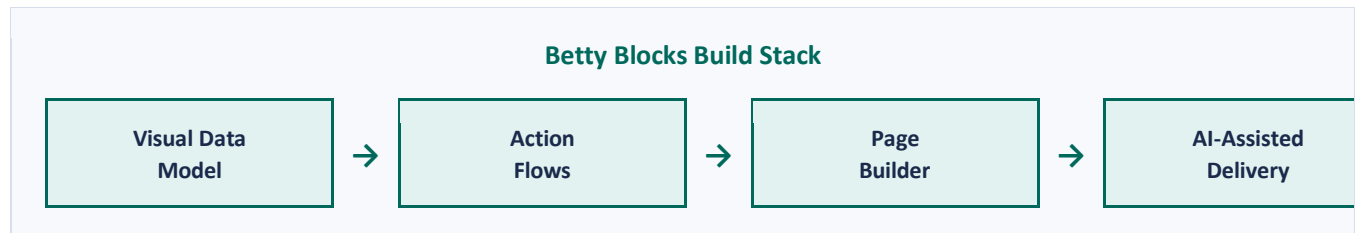

Core Focus: A cost-effective, all-in-one low-code platform built for small-to-midsize businesses and agile teams that need to ship custom applications quickly.

Key Features & Capabilities

- **Deluge Scripting:** An approachable, functional scripting language for business logic, event handlers, and cross-module workflow rules.
- **Automatic Multi-Device Publishing:** Applications render across web, iOS, Android, and tablet automatically, with no extra platform-specific work.
- **Native Zoho Ecosystem:** Seamless connectivity with 50-plus Zoho applications (CRM, Books, Desk, Analytics) alongside common external APIs.
- **Built-in BI & Reporting:** An integrated analytics engine offering dashboards, pivot tables, and scheduled report delivery out of the box.

9. Betty Blocks

Enterprise No-Code Application Platform

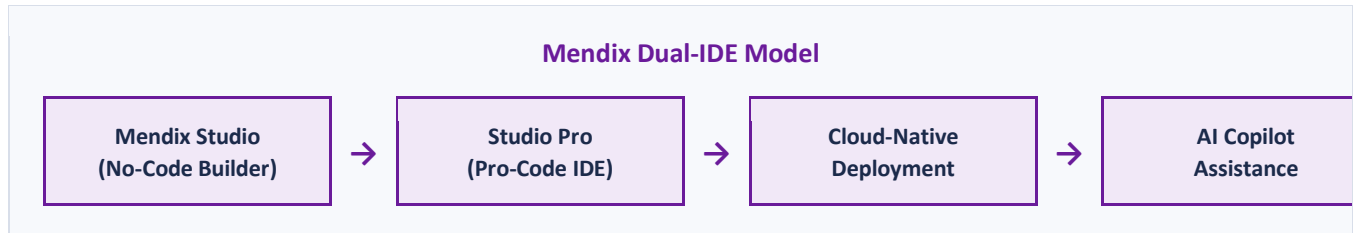

Core Focus: An enterprise no-code platform designed to help large organizations build and scale business applications while keeping IT in control through governed building blocks.

Key Features & Capabilities

- **Visual Data Modeling:** Point-and-click definition of entities, relationships, and permissions for enterprise data.
- **Action Flows:** Visual logic builder for backend processes, integrations, and automated business rules.
- **Reusable Building Blocks:** Governed, packaged components let IT teams standardize patterns for citizen developers.
- **AI-Assisted Development:** Generative tooling to scaffold data models, flows, and UI from natural-language prompts.

10. Mendix

Multi-Experience & Industrial Low-Code Development Platform

Core Focus: A dual-audience platform for multi-experience enterprise apps and industrial IoT solutions, spanning cloud, hybrid, and on-premises deployment.

Key Features & Capabilities

- **Dual-IDE Environment:** Mendix Studio for citizen builders and Studio Pro for professional developers, sharing one underlying application model.
- **Siemens Industrial Fit:** Strong integration with Siemens Xcelerator, MindSphere, SAP, and PLM tooling for manufacturing and OT use cases.
- **Cloud-Native Deployment:** Container-based architecture that runs on AWS, Azure, Google Cloud, or self-managed Kubernetes.
- **AI Copilot Assistance:** Built-in AI guidance for data-model design, logic suggestions, and automated guardrails during development.

Low-Code Platforms Comparison Matrix

A consolidated view across all ten platforms covered in this survey.

Platform	Primary Use Case	Developer Profile	Deployment	Key Advantage
Bubble	Custom web apps & MVPs	Citizen Builders	Bubble Cloud	True no-code full-stack apps
Webflow	Marketing sites & CMS	Designers + Marketers	Webflow Cloud	Design-to-production HTML/CSS
Airtable	Team data & lightweight apps	Business Users + Ops	Airtable Cloud	Spreadsheet simplicity, DB power
Retool	Internal tools & admin panels	Professional Devs	Cloud / Self-Hosted	Fast builds on existing data
Glide	Mobile apps from spreadsheets	Citizen Builders	Glide Cloud	Data-to-mobile-app in minutes
Budibase	Internal tools (open-source)	Devs + IT Teams	Cloud / Self-Hosted	Open-source, full data control
Oracle APEX	Database-driven enterprise apps	SQL/PLSQL Devs	Oracle Cloud / On-Prem	Free with Oracle DB, high scalability
Zoho Creator	SMB-to-midmarket business apps	Business Users + SMB Devs	Zoho Cloud	Fast, affordable Zoho-native builds
Betty Blocks	Enterprise-scale applications	Citizen + IT Pros	Cloud / On-Prem	Governed blocks + AI assistance
Mendix	Multi-experience & industrial IoT apps	Citizen + Pro (Dual IDE)	Cloud / Hybrid / On-Prem	Siemens OT/IoT ecosystem fit
